

ADDENDUM #1 FOR RFQ 127 California Environmental Quality Act (CEQA)

Date: September 3, 2010

- 1-Q. Will the proposed improvements allow for more students at the campus? If yes, how many more (students vs. FTE)?
 - 1-A. No, our enrollments are capped.
- 2-Q. Is there currently a cap on the FTE for the College? If yes, what is the cap and where is the SWC in regard to meeting that cap (i.e., what percentage)?
 - 2-A. Yes, it's approximately 16,000 FTE 100%
- 3-Q. Has the District identified what type of environmental document they are looking for (MND or EIR)?
 - 3-A. The District is looking for MND.
- 4-Q. It is not entirely clear from the RFQ if the College is looking for a consultant for the specific projects described on pages 1 and 2 or as an extension of staff for these projects and other projects as well. For which project(s) should the scope or work and fee proposal be prepared?
 - 4-A. The District is looking for a consultant for the specific projects described on pages 1 and 2, which include both the Central Plant/Devore Stadium and Corner Lot projects. The scope of work and fee proposal should be prepared for these two projects only. The RFP is intended for these two projects at this time, and *may* be used for additional projects, if necessary.
- 5-Q. Have any technical reports been prepared for the project to date?
 - 5-A. None to date.
